github.com/NguyenKhoiTran

Software Developer with hands-on experience in ASP.NET Core Web API, FastAPI, RESTful APIs, relational databases, and RAG-based AI applications. Seeking a Developer position to apply my technical skills, contribute to real world projects, and grow as a software engineer.

EDUCATION

Bachelor of Information Technology

Sep 2022 - Present

University of Transport And Communications - Campus in Ho Chi Minh City

Information Technology graduate with hands-on experience in software development, web applications, databases, and AI applications.

Completed projects using ASP.NET Core, FastAPI, React, Flutter, SQL Server, and RAG.

SKILLS

Back-end : C++, ASP.NET, FastAPI, NodeJs

Front-end: ReactJS, TypeScript, Tailwind CSS

Database: Microsoft SQL Server, MySQL, PostgreSQL

Tools: Git, Postman, Jira, Github

Programming Languages: C#, Python, Dart

WORK EXPERIENCE

Fullstack Developer

Sep 2025 - Apr 2026

Vinacenter Digital World Co., Ltd.

Ho Chi Minh

- Custom Theme & UI Development: Revamped and optimized WordPress interfaces using CSS3 and JavaScript, ensuring a modern, mobile-responsive design and a seamless user experience.
- Backend Engineering: Developed custom PHP functions and integrated WordPress Hooks (Actions/Filters) to extend core functionalities and streamline data processing.
- Performance & SEO Optimization: Enhanced website loading speed and implemented technical SEO strategies, significantly improving search engine visibility and Core Web Vitals.
- Workflow Automation: Engineered custom plugins and automated backend modules, reducing manual content management and operational workload by 30%.

PROJECTS

Legal Chatbot using RAG (Retrieval-Augmented Generation)

Mar 2026 - Jun 2026

- Team size: 1 (Personal Project)
- Technologies: Python, FastAPI, ChromaDB, Hugging Face, Qwen LLM, SQLite, ReactJs
- Developed an AI-powered legal chatbot using Retrieval-Augmented Generation (RAG) to provide accurate answers based on Vietnamese legal documents.
- Built a knowledge base by preprocessing legal documents, chunking content by articles and clauses, generating embeddings, and storing vectors in ChromaDB.
- Implemented semantic search to retrieve the most relevant legal documents before generating responses with the Qwen Large Language Model.
- Developed RESTful APIs using FastAPI for user authentication, chat history management, and chatbot interaction.
- Designed and implemented user authentication, conversation history, legal news, and feedback management modules.
- Optimized retrieval performance by tuning chunk size, overlap, and Top-K retrieval parameters to improve answer relevance.
- Managed SQLite database for application data and implemented error handling and input validation.

Food Ordering System for University Campus

Apr 2025 - Jul 2025

- Team size: 2
- Technologies: Flutter (Frontend), ASP.NET Core (Backend), Microsoft SQL Server (Database)
- Developed mobile application using Flutter, focusing on building responsive and user-friendly UI/UX.
- Implemented core features such as user authentication, product browsing, order management, and user profile screens.
- Integrated RESTful APIs from ASP.NET Core backend for data handling and real-time updates.
- Managed state and optimized app performance to ensure smooth user experience.
- Collaborated closely with Backend Developer to define API contracts and ensure seamless system integration.
- Handled navigation, form validation, and error handling within the app.

CERTIFICATIONS

English: B1 (CEFR)
